3. Gayafores

Over a century of experience decorating lifestyles and designing imperishable ambiances. A definitive warranty that guarantees a great ceramic product of the maximum quality and beauty. GAYAFORES has established worldwide reaching over 80 countries spread over five continents. This becomes as well part of the GAYAFORES philosophy, and the daily effort to offer new possibilities and decorative solutions, adapted to the needs of the market, which aim is to contribute in improving the quality of life of the people that understand the ceramic tradition of GAYAFORES.

The company has facilities covering an area of 160.000m² fully adapted to the use of latest technologies and with a clear goal in getting a “quality process and final product”, what has been awarded by getting the ISO 9001 Certification. We are specialized in coating and porcelain flooring and white body with an annual production over 2.5 million m². Nowadays, GAYAFORES has a global production of over 18.000 m²/day, what eventually can be increased in accordance to picking up demand punctual levels, what guarantees a “quality service”, as one of the main strategic targets for the company.

Raw materials. Just with the most advanced technologies added to a great background experience, and the selection of the best raw materials (glazes, clays, frits...), is possible to achieve a collection of products with high quality and beauty. In this sense, GAYAFORES makes a strict and exhaustive control in the reception and later use of those raw materials, what are controlled before and during the proper production process, in order to avoid contamination in any of the processes of the production.

Commitment to quality. From its early years of existence in 1897, GAYAFORES

got a clear target in offering a quality product, and the appropriate service required by the customers. This commitment and human effort, becomes nowadays an inherent part in the Quality Policy of GAYAFORES, and has been a major when establishing the business strategies of the company, what has finally been awarded by obtaining the ISO 9001 Certification to the Quality control systems of GAYAFORES.

4. Keros

Keros Ceramica is an international company specialized in manufacturing and selling of wall and floor ceramic tiles, with more than 40 years of experience in the industry. Its main objective is focused on offering an exceptional standard of quality and service to its clients, for this reason the company is permanently investing in the most advanced technology, always with the utmost respect for the environment.

Currently Keros Ceramica has two production facilities, one in Nules, Castellon, the traditional center of the Spanish ceramics and the other one in Rousse, Bulgaria, allowing a direct and immediate access to Central and Eastern Europe. As a result of this production internationalization, a deep knowledge of the market can be achieved making it possible to develop the most updated ceramic products. From both companies our products reach more than 100 countries in the world. Keros Ceramica also has a distribution warehouse in Thessaloniki, Greece, Keros Hellas.

At Keros Ceramica our staff continues looking ahead every day, participating in R& D projects, advancing the most creative tendencies and designs that will allow the maximum satisfaction to its clients and associates.

Marble And Granite

Professional Tiles Company is a major importer and retail supplier of premium quality natural stone for commercial and residential building projects. Established in 1998 as a natural extension of a successful custom building business, PTC quickly gained and has maintained a reputation for importing and distributing only the highest quality stone while providing clients with personalized, detailed attention in selecting the right material for their projects.

Our materials are imported from around the world and over the years we've developed and nurtured strong relationships with stone suppliers, which enables us to hand-select and purchase only the best products from the world's foremost quarries.

Professional Tiles Company is one of Oman's leading importers and distributors of Marble and Granite. Since 1998, PTC has continued to build a reputation for impeccable service & attention to detail.

Our selections in tiles and slabs for Granite, Marble are sourced from the best quarries in the world. Some of them imported from India, Oman, Egypt, Spain, Turkey, China etc.

With a clear understanding of building trends and changing standards in style, PTC continues to lead the industry with existing new product lines finishes for our growing client base.

Mosaic Tile

Terrazzo is a composite material either poured in place or precast or hydraulically pressed as tiles. Terrazzo is used for floor and wall decorative finishes. It consists of marble, quartz, granite, glass or other suitable chips; sprinkled or unsprinkled, and poured with a binder that is cementitious, chemical or a combination of both. Terrazzo is cured, ground and polished to a smooth surface or otherwise finished to produce a uniformly textured surface.

PTC Terrazzo floors are made from top quality materials such as Italian marble, the finest white marble chips, scintillating glass or mirrors.

Product Range

Mosaic Tiles Sizes: **300 X 300 X 30 MM**

Roof tile (HDR)

In 1989, after more than 30 years of manufacturing bricks, la Cerámica Hermanos Díaz Redondo opened a new factory to make mixed tiles. They were determined to achieve the same objectives as they had in their brick manufacturing: to produce the best tiles possible. In 2006, production was improved with the opening of a modern plant for special pieces. This meant we were able to meet the demands of the builders and guarantee the best finishing for the roofs

Nowadays, our tiles are selected by and preferred by the majority of building professionals as well as being requested by home owners. A roof complete with tiles, manufactured by the grupo diaz redondo is a guarantee of durability, impermeability, ease of laying, excellent finish and uniform, permanent colour. That is why; our tiles have crossed frontiers and are present in various countries in three continents.

Our tiles comply with all the guarantees demanded by the building regulations in the most important countries. They are produced under rigorous control, which enables us to guarantee then for 35 years, against ice and any hidden manufacturing defect that may appear.

In the present catalogue, we are proud to offer one of the best collections of contemporary tiles, with a wide-ranging palette of colours and finishes and with various models, which can be adapted to the most diverse architectonic styles. The catalogue includes the classic mixed, indispensable and imperishable, the occitan, minimalist and delicate, and the flat tiles like the marseille and the original moneo, born out of our collaboration with the architectural genius of that name

In accordance with the regulation ISO 9001 and the Particular regulation of the AENOR trademark for ceramic materials. All the manufactured products and the production control system for manufacturing tiles comply with all the Spanish and European regulations and therefore have the mark N All the manufactured products comply with the legal requirements of the European Guidelines 89/106/CEE (the later modification Guideline 93/68/CEE) for “Construction Products”, and for this they have the CE marks. We have a solidly implanted quality control system, which is involved at every level of the employees and the management, on a daily basis. Its objectives are to improve the product, maintain safety in the production and to have the maximum respect for the environment. Hermanos Díaz Redondo S.A. possesses the Integrated Environment Authorization, which certifies that it complies with all the environmental requirements of the legislation in force and that it is committed to the environment. In the same way we

are in the position to establish integrated management of quality system.(regulations ISO 9001,OSHA 18001) as well as the Prevention and Environment (regulation ISO 14001).

With nearly a century of experience, the HDR label is known worldwide for its excellent reputation in producing roofing tile. HDR has made a commitment to research and development, so that we can be sure every tile you purchase is state-of-the-art in design, specialization and manufactured quality. In every phase of our production and with every variety of tiles, our goal is always the same: to manufacture a clay tile that is of consistent high quality.

Clay tile is known for its long-term durability and longevity by being wind, hail and fire resistant. Boral Roofing's modern manufacturing techniques enhance this durability giving customers a roofing product that's sure to last a lifetime.**
